

Autry Technology Center Connected Me to My Future

Picture yourself in your future and develop your career at Autry Technology Center

Gray earned a bachelor's degree in Business Management and had several jobs in finance and restaurant management before he found his niche in Radiology, thanks to training at Autry Technology Center. He is now the Clinical Coordinator/Instructor for Radiography and MRI Program Coordinator at Autry, in the very program he graduated from 11 years ago.

"You might say that Radiography was in my blood," says Danny. "My brother is a radiologic technologist (RT); I have other relatives who work in the field and an uncle who works on x-ray equipment. I chose to train at Autry because the curriculum and clinical experience are top in the country and it is a well-established program."

Danny worked as an RT at a local hospital and then as an MRI technologist at an outpatient facility before he joined the staff at Autry. He enjoys watching students come into his class knowing nothing about Radiography and grow into experts ready to get registered and go to work. He is proud of the fact that everyone who has gone through the program has passed the American Registry of Radiologic Technologists Exam.

"You are never too old to find the perfect career," according to Danny Gray. "I tried lots of things and did not find my niche until I was 30. I love my job and think this career field is full of opportunity."

Danny Gray
Graduate of Autry Technology Center
September 1995
