

# Autry Technology Center Connected Me to My Future

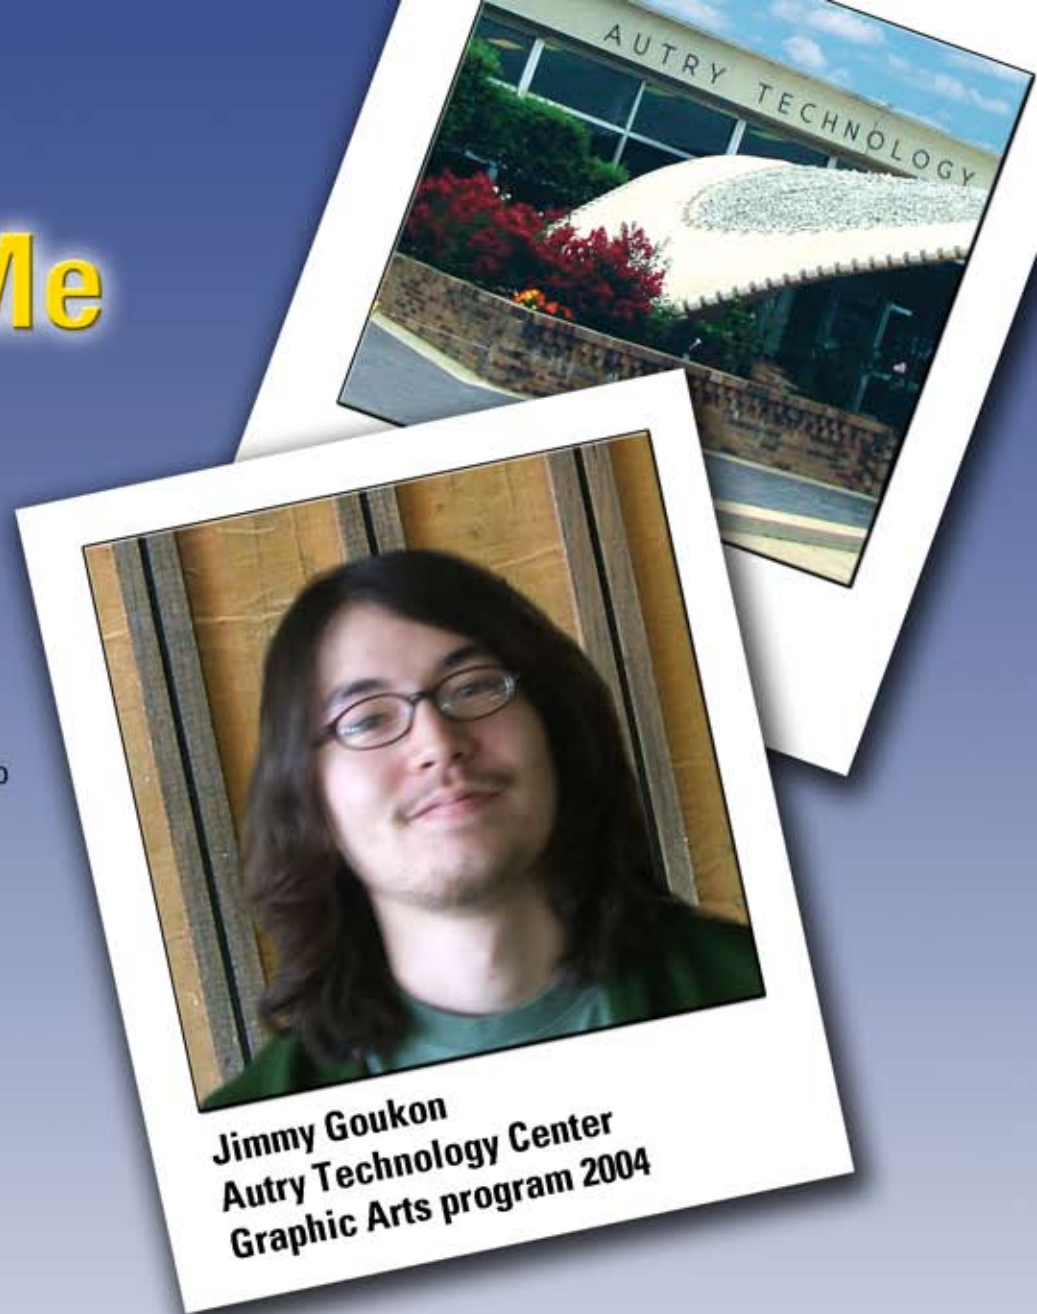

Picture yourself in your future and develop your career at Autry Technology Center

Jimmy Goukon IS the art department at Downey Decal, a relatively new company to Enid. He does graphic design, and also gets to work with customers and the many types of printers used by the company. He is always happy to learn new things.

He is bright, articulate and takes tests well, but he hated high school and dropped out before he graduated. He moved to Enid from Midwest City and was not sure what would be next. Jimmy had an interest in art and computers, and when he heard about the Graphic Arts program at Autry, he thought it would be worth investigating.

"The Graphic Arts program is very hands-on. The environment is fun and I got a chance to actually learn how to do things. Autry offers top-of-the-line training on cutting-edge technology, which is great because it makes you aware of what's out there," says Jimmy. "Autry gives you what you need for what you are going to do."

Jimmy loves his job, enjoys working for a small company where he is involved in many different aspects of the business and is considering going to college someday. He appreciates the training he received at Autry and believes many other adults can benefit from the personalized training opportunities provided there.
