

Autry Technology Center Connected Me to My Future

Picture yourself in your future and develop your career at Autry Technology Center

In 1992 Kim McFarland was working at a pizza restaurant and volunteering her time as an EMT with the Byron Amorita Fire Department. She was interested in a career in the medical field, but wasn't sure what all the opportunities were...

When she learned about the Surgical Technology program at Autry Technology Center, it sounded like a perfect fit. She traveled to Enid, filled out an application for the program, interviewed with the instructors and moved to Enid to study for her new career.

After graduating from Autry, Kim worked at a local hospital for nearly ten years. When she heard that her former Autry instructor was retiring, Kim jumped at the chance to share her knowledge of the field and passion for her work with students and joined the staff at Autry as the director of the program from which she graduated.

Kim's favorite part of her job is watching her students learn. She loves seeing the look on a student's face when he finally grasps a concept that he thought he could not master. She is proud of her students and knows her work makes a difference. Graduates of her program work at both Enid hospitals, as well as other hospitals across the country.
