

Autry Technology Center Connected Me to My Future

Picture yourself in your future and develop your career at Autry Technology Center

Peggy Miller had a job, but she was looking for a career. Twelve years ago she visited Autry Technology Center and met with one of the career counselors, hoping to find a career path that would match her interests, have a flexible schedule and provide opportunity for her. After taking an interest inventory and talking with the counselor, she decided the medical field, and specifically nursing, would be the perfect fit for her.

"I wanted to work in an area that I knew there would always be jobs available and I love people. Being the charge nurse at The Care Center at The Commons is a great job for me. I've been there 11 years and I enjoy working with the elderly residents. They are fun and they have a lot to tell," says Peggy.

She chose Autry as the place to train to be a nurse because she wanted to learn a lot in a short period of time. She likes learning, but did not want to have to spend many years training before she could begin her career. The Practical Nursing program was a one-year commitment with a big pay off. She appreciated the dedicated instructors and the small class.

She recommends the Practical Nursing program, as well as other medical career opportunities and other types of training, to her family and her coworkers. "My son, Tom, is about to graduate from the Auto Collision Class. He really excels in that area and it's been a great program for him. And I tell my co-workers what a great place Autry is all the time," she says. "I love Autry. It's awesome."
